

Eggleston Brothers
C07/07
Eggleston Brothers Ltd
£345,000

Summary:

The provision of a front and rear extension to an existing warehouse that substantially increased the footprint area.

This involved the construction of new piled floor slabs incorporating a vehicular ramp and pedestrian access, the erection of portal frame steelwork structures, the installation of new crane rails plus an insulated cladding system, blockwork and brickwork and brickwork walls.

New downpipes from the extended roof area were added and existing drainage systems updated to accommodate the additional flows from the increased roof area.
