

Nestle Omni Building

C14/07

Nestle UK Ltd

£3,745,000

Summary:

The client, Nestle UK Ltd, required access to the new production building in 26 weeks. The steel framed structure incorporated piled foundations and a 4400m² laser leveled floor with fibremesh reinforcement.

The external cladding included a combination of glazing and kalwall cladding a product that is translucent and allows natural light into the production facility.

The external works for the project involved the construction of a lorry parking area, access roads and landscaping works that included a lake and reed bed.
